

Kendra Fu made a huge contribution to Destination Imagination at York House School from grade 8 to grade 12. Upon graduating from York House, Kendra attended Waterloo University to study Civil Engineering. Sadly, our dear friend Kendra passed away in January while at school.

Kendru was a true DI-er in every sense of the name; she was creative, she was artistic, she was passionate, and most importantly, she was kind to a fault. She enjoyed everything that life had to offer. Within DI, Kendra dedicated herself to developing out of the box ideas and helping out in every way that she could. Her contributions both her community will remain ingrained in the memories of her teammates and all who knew her.

Besides Destination Imagination, Kendra was active in both the arts and sciences. A talented artist, Kendra developed her love at an early age at Vancouver Academic of Dance and with the University Community Children's Choir. Later she attended Arts Umbrella and dedicated much of her time in the school art studio. Very interested in science, she took part in and won multiple awards in many regional and national science fairs. She also volunteered in a number of community activities including Bard on the Beach and at her schools.

In Kendra's memory, her York House Destination Imagination team wishes to award a \$1,000 scholarship to a student who embodies the spirit of Kendra Fu both in and out of the Destination Imagination program. We want to recognize someone who is not only involved in DI, but also demonstrates that diversity of interests in the rest of their lives and gives back to their community. Our aim is to acknowledge exceptional students while keeping Kendra's memory alive among the DI community.

Criteria for award:

- Has participated in Destination Imagination and attended at least one recognized tournament
- Has demonstrated achievements in a wide variety of areas
- Studies/participates in two or more diverse subject areas
- Has given back to the community through volunteering
